WORK EXPERIENCE

Field Nation, Senior Strategist Sep 2025 – Present
Hybrid

- Designed **strategic scorecards** and **stage-gate requirements** for emerging new core products enabling phase wise stop/go decisions.
- Conducted **product market fit discovery** for QSR vertical, identifying a ~**\$200M** untapped revenue opportunity by leveraging market health data with external market intelligence.
- Own **strategic recommendations** and course correction planning for at-risk markets.
- Partnered cross-functionally with Product, Finance, and CS on **3-year corporate strategy refresh** and board approval to achieve **\$650M** revenue.
- Leading **enterprise AI/ML and agentic AI product adoption**, facilitating POC pipelines to evaluate and deploy intelligent agents across core business processes.

Tools: Tableau, Amazon Redshift, Salesforce, Python

Optimizely, Manager, Customer Success Analytics May 2023 – Jun 2025
Hybrid

- Led a **4-person global BI team** delivering customer playbooks and self-serve reporting across global CS operations, supporting analytics requirements across EMEA, APJ and NA.
- Owned **customer success analytics** for Optimizely's enterprise **A/B testing platform**, refining the Ideal Customer Profile (ICP) target model **reducing post-trial churn by ~13%**.
- Improved **multi-product adoption** from **1.6 to 2.2** by building whitespace and propensity models.
- Delivered **\$800K in expansion ARR** in SMB segment by identifying underutilized features and operationalizing an **Experimentation Maturity Score** to drive targeted upsell.

Tools: Power BI, Snowflake, Mixpanel, Python

Robi Axiata Ltd.

Manager, Insight and Action, Product & Pricing

Nov 2022 – May 2023
Dhaka, Bangladesh

- Developed and executed long & short-term **product strategies**, road map to increase ARPU and new product adoption.
- Discovered base and PMF for **OTT bundle products** to improve product penetration and optimize pricing across market segments.
- Managed **regional dynamics**, expenses and ensure efficient utilization of budget through various cost optimization and pattern analysis.
- Developed price **elasticity model** for price optimization and predicting base movement.
- Built revenue **forecast model** using ARIMA, SARIMAX, Exponential Smoothing improving forecasting accuracy by 17%.

Tools: Tableau, PL/SQL, Facebook Analytics, Python, Hive, Cloudera, Spark.

Business Insight Manager, Corporate Strategy

Sep 2021 – Oct 2022
Dhaka, Bangladesh

- Developed and delivered the **data product roadmap aligned to Robi's AI strategy** – drove Robi to Champion status in the Axiata Group AI Maturity Index across all OpCo's.
- Designed and launched an **automated management reporting**, including migration 90+ manual reports to a scalable, self-serve Tableau platform.
- Regularly presented company **performance and market intelligence** to senior leadership to drive strategy decisions.
- Collaborated across functions on product **impact analysis** and strategic prioritization of regional sales drives.

Tools: Tableau, PL/SQL, RPA, Facebook Analytics, Google Analytics, Python, Hive, Cloudera, Spark.

Technical Product Manager, IT

May 2021 – Sep 2021
Dhaka, Bangladesh

- Served as technical **product SME** in daily standups and backlog grooming for Corporate Website, Robi App and HRIS solution and owned **vulnerability benchmarks**.
- Led cross-functional **product tool evaluations** and **vendor assessments** for process optimization and new product developments.

Tools: Jira, OpenProject, Nessus, Trello

Management Trainee, IT

May 2019 – Apr 2021
Dhaka, Bangladesh

- Architected and launched in-house **RPA automation product from 0 to 1** – built MVP, iterated on feature design, and achieved adoption across business units; saved 12 FTE and 5,000+ manhours in year one alone.
- Revamped corporate website architecture to cater the newly developed **Web Self-Care portal** reducing bounce rate by **20%** for the increased footfall.
- Defined solution architecture for LLM based **recommendation engine** for BINGE personalized content discovery for local content.

Tools: Python, Docker, Selenium, Ansible, Jenkins
